The color of raw materials or a sample strip is subject to variation from the color chip reproduction above. Colors above are as accurate as can be produced using the finest materials of reproduction. Job site variations from the above color may occur due to the differences in the local raw materials and methods of application. Before final color selection is made, a job site panel should be erected and approved.

With the addition of Proline's high quality life-like texturing tools and accessories, you are sure to create the most realistic floors and hardscapes imaginable.

www.prolinestamps.com

The colors shown are approximate, and as close as possible, to represent concrete with fast trowel finish and sealed with Dura Seal HG Sealer. Proline Dura Products is not responsible for application methods, finishing techniques, job site conditions, curing methods, and other conditions and therefore cannot guarantee an exact match. Various texturing and finishing techniques such as troweling or brooming, the use of sealers, and color variations in raw materials can produce variations in colors. Proline Dura Products highly recommends a representative job sample be done for each product.

ACID STAINS

(CONCRETE CHEMICAL STAINS)

CARROLLTON • FT WORTH • BUDA • HOUSTON
